2 Introduction

In line with growth objective of acquiring one million new customers and 67% loan book growth, Retail Digital banking, intends to introduce short term, unsecured Digital loans which will be managed separately and outside the conventional NCBA systems. The solution targets Small Medium and Enterprises with DFS as the anchor product, direct SME lending and supply chain Finance.

The database, Loan management system and mobile application will be housed within NCBA. The product will be offered in partnership with Pezesha who will provide e2e white-labelled Loan origination and loan management system with an end of day entry into the NCBA general ledger (GL) for reporting purpose as well as integrate with third party data aggregators including Safaricom, credit reference bureau(s) and IPRS.

The loans will be accessed through a white-labelled USSD, embedded Finance API, mobile and web application.

Pezesha is a Kenya based Fintech, approved by CBK, processing more than Ksh 350M loans monthly. Pezesha's customizable infrastructure has been operating for the past 6 years and can be applied vertically and horizontally across value chains. They are enabling digital lending to MSMEs through Embedded Finance technology services to FinTech distributors like Twiga Foods, Market force, Jumia and direct SME lending on their platform.

2.1 Problem Statement- What problem are we solving for?

Below are the key customer pain points that the proposition intends to solve for:

- Manual Onboarding process: - No current capability of Digital KYC and customer on-boarding.
- Lengthy credit appraisal process: - where security is available, the associated timelines for appraisal and credit decision is lengthy resulting to lost business opportunity.
- Data: - Unavailability of data to underwrite SMEs for financing and where available, the data is not structured for credit decisioning
- Lack of bespoke solutions to meet emerging business and industry needs.

2.2 Value Proposition- What do we intend to achieve?

The proposed partnership is based on business value that the bank intends to unlock. Some of the key value drivers include:

- New Customer acquisition and growth: - using an e2e Loan Origination System (LOS) and loan Management System (LMS)
- Balance sheet growth: - Existing customer base and loan book to be scaled up with other cross sell opportunities
- Data: - Access to rich data of Banking ready customers from various embedded partners to be monetized.
- Technology: - White-labelled solution offering Digital KYC, customer onboarding, loan origination and loan management system.
- Improved customer experience: - due to seamless processes and reduced TAT
- Cost Reduction: - due to automated processes and operational efficiency.

2.3 Project Scope

The project scope includes:

2.3.1 Customer acquisition, lending and Cash Management Services

The scope for **phase 1** will primarily focus on customer acquisition and loan book growth through digital lending. Below is what is covered within the scope of **phase 1**.

1. **eKYC and Digital Onboarding**
   There will be tool for eKYC and Digital onboarding to assist with NTB customer acquisition. Channel of access for customers will be through the App.
2. **Loan Origination System (LOS)**
   The loan origination system will have three channels of access for customers: App, USSD and Web service. Customers will choose their channel of choice.
   a) Loan Application
   b) Loan Repayment
   c) Account Services (Loan Balance, Mini statement, Full statement
3. **Loan Management System (LMS)**
   a. Onboarding Anchors and Retailers
   b. Loan Enquiries
   c. Disbursement
   d. Collections
      Collection for 1-30 DPD will be handled by Pezesha to assist improve on portfolio quality.
   e. Credit Scoring (Loan Limits)
   f. User & Role Management
   g. Reports – Disbursements, on-boarding, loan classifications, revenue trends, failure and success reports.

4. **Embedded Finance/Distributor Finance API** which will enable the bank have access to rich ecosystems of partners with existing customers and data that can be monetized.
5. **Direct SME Lending: Phase 2**
6. **Integration to T24**

Below is the summary of project phases;

Phase 1	**Phase 2**	**Phase 3**
Customers – Targets existing to bank customers	**Customers** – Target new to bank customers (Hybrid)- DFS/Embedded finance	OCR enabled model - DFS/Embedded finance
Channels - Web-App and Mobile App Android	Channels-USSD, IOS	Fully automated eKYC - DFS/Embedded finance
Scoring- KYC and fraud verification checks, CRB checks, Credit scoring (embedded finance/DFS only)	Direct SME lending	Direct SME eKYC automation
Integration to T24 and Kollect Pro, IPRS, KRA, CRB	Scoring (Direct SME lending)	
Reports	Reports-Customizations and Additional reports)	

	OCR and BRS	

2.4 Channels in Scope

- Mobile App (Android, iOS, Huawei)
- Web
- USSD

2.5 Products in Scope

- Distributor/Embedded Financing
- Direct SME lending

2.6 Customer types

- Existing NCBA Customer
- New to Bank Customer

2.7 Key Considerations

Consideration note	Consideration
KYC Validation	• IPRS, KRA and eCitizen checks will be undertaken by Pezesha prior to distributor/Customer onboarding data being sent to NCBA systems. • Validation of Business documents, image & liveliness check is required before an account can be opened digitally
CRB Status check	• CRB check will be undertaken by the Bank prior to Loan request being processed.
Error Handling	• Error Handling Process and retry mechanism and notifications will be used.
Account Management	• Normal Account Rules Apply for example limits and active or dormant account management.
Reconciliation	• Reconciliation will be done using the existing process.
Scoring	• Scoring will be based on Scorecard tool provided by Pezesha

3 REQUIREMENTS

3.1 High Level Requirements

Platform	Feature /Capability
Mobile App	Sign up & Profile Creation (Customer who is new to the App)
	Sign in (Existing to Bank Customer) - Validation if customer exists on T24 - Validation if retailer is linked to Anchor.
	Digital Onboarding (New to Bank Customer) - KYC Validation - IPRS check - KRA PIN validation - Liveliness Check - Comparison of ID and Image - BRS Validation
	Credit Scoring/ Check Loan Limit - Mpesa, Bank statement upload
	Loan Application
	Loan Disbursement - Accounting Entries (T24)
	Check loan Balance
	Loan Repayment - Automatic Debit from NCBA account - Mpesa/ NCBA Account/
	Notifications
LMS Dashboard	Onboarding of Anchors
	Onboarding of Retailers & Linking the retailers to anchors
	LMS Dashboard
	Credit Scoring
	View Customer information
	View Loan Applications
	Loan Products Set up
	Collections
	Transactions details
	Admin Module (User & Role Management…)
	Reports

3.2 Detailed Requirements

Functional Requirements

This describes the onboarding, loan origination, credit scoring, loan disbursement and collection process.

For Distributor Finance,

a) The system should have a capability to onboard Distributors
   - Distributors will be required to provide a whitelist of retailers and their related transactional data.

b) The system should have a capability for linking Retailers to Distributors using the retailer account number

- **Requirement 1.0 (i)**: Distributor/Customer/SME downloads APP or dials USSD to access the services.
- **Requirement 1.0 (ii):** The service will be made available via white-labelled NCBA APP/USSD
- **Requirement 1.0 (iii):** The service will be made available to new and existing customers.
- **Requirement 1.0 (iv):** The customer will be required to download App to self-onboard.
  The customer will be required to provide KYC details depending on the business category and complete onboarding process:
- **Requirement 2.0 (i):** NCBA system receives registration request and creates Customer.
  - The onboarding application needs to be reviewed and approved before a customer is onboarded for NTB
  - All KYC documents and the liveliness of a customer need to be validated before a customer is onboarded digitally

  Note: For Existing customers on T24, the system should pick the T24 customer ID and forward the same to LMS for loan booking.

- **Requirement 2.0 (ii):** The system should create an Account category 1043- Distributor finance account for the distributor/Customer.
- **Requirement 2.0 (iii):** The customers will be created under SME banking segment, while the loans will be under product category **03113-Distributor Finance product.**

  Note: Customer registration failures will be notified appropriately Via SMS

3.2.1 Account opening process

This is described in detail in the attached process, also included in appendix

Customer onboarding process v

NB: For New to Bank customers, their will be a need to validate Customers KYC, bio and their business documents

3.2.2 Loan application & Disbursement

- **Requirement 3.0 (i):** Loan application will happen via APP, USSD or Web
- **Requirement 3.0 (ii):** The customer will be presented with the following menu options upon selecting Distributor Finance main menu:

  Distributor Finance service
  - **Apply Loan**
- Select supplier/program (Only suppliers linked to the logged in customer will be displayed.
- Enter loan amount (qualified limit will be displayed)
- Choose loan tenor
- Confirm details and submit loan request
  - Pay loan
  - Check Loan Limit
  - Check Loan status
- **Requirement 3.0 (iii)** NCBA system (LMS) should process the request and if successful, the system will create a Loan Account **(Product Category 03113)**, then debit the Loan Account and credit the **customer account**.
  Note:
  - ✓ Loan booking to be done with the LMS
  - ✓ All the entries in LMS to be passed to T24 and GLs as a single file entry at a time to be prescribed by Tech and Ops.
- **Requirement 3.0 (iv):** The system should debit the customer account and credit the charges to the respective GL accounts; then credit loan amount less charges and send notification to customer.
- **Requirement 3.0 (v):** Disbursement to distributor/Customer will be less charges and excise duty
- **Requirement 3.0 (vi):** The loan amount requested should not exceed the Customer credit limit.
- **Requirement 3.0 (vii):** Line of credit will be availed for customer to utilize within their credit limit. However, customer cannot have more than one outstanding loan at any given time.

  Note:
  - ✓ Amounts greater than Customer's eligible loan limit will be rejected with an appropriate message.

  Failed requests declined due to other reasons like CRB, existing Loans will be advised with appropriate message

3.2.3 Loan Repayment

- **Requirement 4.0 (i):** Paybill and STK push capability required.
- **Requirement 4.0 (ii):** The customer will be presented with the following menu options upon selecting Distributor Finance main menu item: Customer Financing service
  - Apply Loan
  - **Pay loan**
    - From NCBA account
    - From Till
    - From Mpesa

NB: There will be an option for Automatic debit through T24 COB or sniffing tool

- Check Loan Limit
- Check Loan status

- **Requirement 4.0 (iii):** Customer Selects 'Pay loan', the system will display the details of the outstanding loans to the customer and prompt the Customer for partial or full loan settlement. Customer selects either partial or full settlement.
- **Requirement 4.0 (iii):** Customer selects 'source of funds (Bank/M-Pesa)' to make payment. System prompts for repayment amount (in case of partial repayment).
- **Requirement 4.0 (iv):** Customer inputs loan repayment amount, the Customer will then be prompted to enter PIN to confirm. System displays message indicating repayment amount will be debited from Customer's Mpesa account and credited to Customer's loan account.
- **Requirement 4.0 (v):** in a case of full repayment, Customer will be displayed for the outstanding loan balance and prompted to enter PIN to confirm.
- **Requirement 4.0 (vi):** Payment will be reprocessed and confirmation sent to the Customer.

Note:

Failure due to system time-out or insufficient funds will be rejected with an appropriate notification.

3.2.4 Check Loan Limit.

- **Requirement 5.0 (i):** Distributor/Customer dials USSD or logs in to the NCBA white-labelled App.
- **Requirement 5.0 (ii):** The Customer will be presented with the following menu options upon selecting distributor/Customer Finance service on main menu item:
  Customer Financing service
  - Request Loan
  - Pay Loan
  - **Check Loan Limit**
  - Check Loan Balance
- **Requirement 5.0 (iii):** Customer selects 'Check loan limit' to check limit
- **Requirement 5.0 (iv):** System queries patascore or LMS to get customer limit and displays/send to the customer on request. The same limit will be available on the portal for users.

3.2.5 Check Loan Balance.

- **Requirement 6.0 (i):** Customer dials USSD or logs in to the App to initiate loan Status balance.
- **Requirement 6.0 (ii):** The Customer will be presented with the following menu options upon selecting Customer Finance services on main menu item:
  Customer Finance service
  - Request Loan
  - Pay Loan
  - Check Loan Limit

- **Check Loan Balance**

- **Requirement 6.0 (ii):** Customer selects 'Check loan balance'
- **Requirement 6.0 (iii):** The Bank receives the request and queries customer's loan balance from LMS/core banking.
- **Requirement 6.0 (iv):** NCBA will process the request and provide response back to customer in form of message or display notification.

3.2.6 Credit Scoring

- **Requirement 7.0 (i):** The LMS will have an inbuilt efficient and easy to use credit scoring algorithms and score cards. The credit scoring tool will process accurate real time scoring and maintain customer limits.
- **Requirement 7.0 (ii):** The LMS will compute the credit scores of customers and assign credit limits of each Customer based on KYC and transactional data received from the customer and partner/supplier and CRB, among the various data points. There are a set of business rules, credit cut off and lead management through system configuration that define lending risk management.
- Once the credit scores have been computed, SMS notifications with a link to the app will be sent to the customers prompting them to access the facility

Below template guides on how credit scoring should be defined and executed

Pezesha scorecard approval - updated 7

Key Accounting Entries given below:

- **Requirement 8.0 (i):** The LMS to create entries on real time basis as shown on the table below with corresponding entries in T24:

Below are the expected accounting entries

NCBA PEZESHA ACCOUNTING ENTRIE

3.3 Other Considerations

Credit Administration:

3.3.1 Requirement 9.0: Portfolio Management

SMS notifications will be sent promptly and will be categorized as below:

Transaction Notifications:

This will be sent on real-time basis and will relate to below transactions:

- Loan limit check
- Loan disbursement
- Loan balance check
- Loan repayment

Porfolio Management messages

This category of messages will be sent based on the age of the loan. There will be loan ageing service that will assist manage the loan schedule and trigger release of the messages at the appropriate time. The messages will be sent before, on and after due date.

Portfolio monitoring and Risk triggers

Key Triggers	Target	Portfolio Triggers
Frequency of late repayment (>15 days)	Once a month for three consecutive months	Aggressive early collection efforts by RED team
Persistent late repayments (>30days) for more than 5% (by number) of distributors of any particular supplier under the scheme.	6.5%	RM/Product manager to engage the partner/supplier to review any challenges and support on customer engagements
NPL @ portfolio/scheme level	5%	a) Heighten collection and recovery efforts b) Invoke partnership clauses on: • Stop orders • Support on collection
Any material change/decline in the number of retailers/distributors by the Supplier	50%	a) Close portfolio monitoring b) Suspend lending c) Deploy exit strategy
Any event that affects the supplier's market presence that might adversely change the marketability of its products.	To be monitored	a) Suspend lending b) Deploy exit strategy

3.3.2 Requirement 10.0 : Loan grading and risk classification

Loan grading and risk classification will be done as per the CBK prudential guidelines and bank internal credit risk policy:

Grade	Classification	No of days past due
1	Normal	0 – 30
2	Watch	30 – 90
3	Sub-Standard	90 – 180

4	Doubtful	180 - 360
5	Loss	360+

3.3.3 Requirement 11.0 : Penalty on default:

The loan to incur a penalty of 30% monthly based on the outstanding principal amount.

3.3.4 Requirement 12.0 : Loan Loss Provisions

Non- Performing loans will be provided for as per the CBK prudential guidelines and IFRS 9 guidelines. Write off shall follow the laid down process.

3.3.5 Requirement 13.0 : Reporting Requirements:

a) Reports will be generated from BI and from the portal
b) Customer creation reports –success and failures (status) with failure reasons will be availed on the portal
c) Loan requests –Success and failure (status) with failure reasons
d) Loan repayments - Success and failure (status) with failure reasons
e) Overdue Loan reports, Ageing in days, value and accrued interest and penalty
f) Loans rolled over report
g) Commissions collected report, per day, Month, year and split between the Interest collected and arrangement fees

3.3.6 Requirement 14.0: Back Office support

Back-office processes/support	
Department / Unit	**Responsibilities**
Account Maintenance Unit (AMU)	• Exception management for e-KYC flags, IPRS /KR • Data perfection – Mandates, Account maintenar IBPS archiving….
Contact Centre	• Customer enquiries and support
Branches	• Customer support
Digital Channels/Analytics	• E2e view of the solution • Management Information • Reporting
Risk & Compliance	• SAAS AML management

3.3.7 Requirement 15.0: Collection process

COLLECTIONS RECOVERIES PROCED

3.3.1 Requirement 15.0: Loan Payment Requirements

Below are the Loan Payment options

1. **Principal Reduction**
   - This is a partial reduction in the outstanding loan balance before the loan matures. This affects the calculation of accrued principal balance where once a customer reduces their loan balance, the system will calculate the accrued interest using the reduced loan balance.
2. **Settlement of arrears/ Repayment**
   - This is offsetting the outstanding loan arrears in a loan account either partially or fully, this has an impact on the calculation of penalty interest as the accrued penalty interest will be calculated using the overdue principal and overdue interest.
3. **Prepayment of future installments**
   - This is pre-paying the future installments before they fall due where a customer can opt to pay for the next 3 installments today and the system should not debit their account until month 4.
4. **Loan Payoff**
   - This is fully repaying the entire loan balance inclusive of accrued interest and any penalty amount.

PRINCIPAL INTEREST COMPUTATION.xlsx

4 Product Proposal

This describes the features and parameters of the proposed product including the risks and controls put in place to manage the product. Attached here in the product proposal:

No.	Questions being addressed	Commentary
PD1.	What is the product or service?	
The product is distributor finance, which is a short-term working capital loan to business customers to help address business cashflow challenges. The product is short in nature (up-to a maximum of 90 days) depending with the industry and the product cycle and will be offered digitally through mobile. A retailer/Distributor will have one loan at any given time. However, a line of credit will be availed for the customer to utilize up to their maximum qualified amount within the tenor of the facility. Facility fee will be charged for every drawdown. This will be an unsecured facility offered to distributors/retailers in specific ecosystems with short term trading cycle. The product aims to lend purely on the basis of a client's trading history with the anchor and business volumes, subject to a positive/good bureau score. The success of the product will be achieved by partnering with strategic partners to scale the business.		
PD2.	Who are the customers and what is the loan purpose?	
The customers for this product are retailers/distributors/merchants that are in business and are buying products from a given supplier for onward resale. The customers must be in active business at the time of loan application. The customers must be trading with the anchor/supplier for at least 3 months at the time of application.		
PD3.	What is the underlying customer need?	
This is a working capital finance product. It is to address short term cash flow changes and business needs.		
PD4.	Who are the parties involved in the transaction?	

A. The table below details the key parties involved in the transaction.

NCBA Bank	Pezesha	Distributor/Merchant

No.	Questions being addressed	Commentary
▪ Retail Digital Banking ▪ IT (channels and T24) ▪ Credit operations ▪ Business Banking ▪ Contact centre/CX ▪ Credit Risk/collections ▪ Finance/BI/Analytics	▪ eKYC ▪ Customer onboarding ▪ Credit scoring ▪ Loan origination ▪ Loan disbursement ▪ Loan repayment ▪ Collections ▪ Dashboards and analytics	▪ Main Borrower ▪ Borrows and repays loan

B. Processing is done 100% digital through Pezesha platform and NCBA channels and T24

The processing of these transactions will be customer generated and fulfilment is through the Pezesha system.

The lending decision will be based on an automated scorecard whose inputs and decisioning logic have been reviewed.

PD5.	Describe the key steps in delivering the product.

Below is a high-level summary of how the product will work:

1. **Customer On-boarding**

   All distributors/merchants will be on boarded digitally through the Pezesha application. The following are the ways proposed for this:

   - Rely on KYC Pezesha has on existing customers allow customers to opt in during application the capture KYC data via API.
   - Do a bulk upload and scoring of all distributors/merchants from Pezesha data base.
   - Individual new to bank customers to download white-labelled App from the store and register
   - Virtual accounts/wallets will be opened in LMS with a corresponding entry in T24.
   - Separate exercise to handle exception with missing/insufficient KYC or to capture mandates will be done where applicable.

2. **Customer borrowing**

   - Customer originates the loan request from App, Web or USSD, system scores and assigns limit.
   - Disbursement will be made to the supplier's account.
   - A loan account is created in the LMS and with corresponding entry in T24.

3. **Repayment management**

No.	Questions being addressed	Commentary
	Loan repayment will be initiated by the customer or through automatic debit. Below options will apply: • M-Pesa stk push • NCBA account through mobile USSD and App • Automatic debit through T24 COB or sniffing tool	
PD6.	What volumes are being anticipated? 12B in year one	
PD7.	What are the product features?	

Loan amount	▪ Minimum loan amount: from KES 500 ▪ Maximum loan amount: KES 500,000
Security	▪ Unsecured
Tenor	▪ Based on nature of product and product conversion cycle ▪ Minimum tenor: 7 days ▪ Maximum tenor: 90 days
Loan price	▪ Facility fee: Up-to 4% ▪ Interest: Base rate + 4.1% (pro-rated for the period of the loan)
Disbursement options	▪ Directly to supplier's NCBA account with appropriate narrations ▪ Disbursement to M-pesa till/Paybill
Channel of access	▪ Mobile App and USSD
Method of Repayment	▪ M-Pesa stk push ▪ NCBA account through mobile USSD and App ▪ Automatic debit through T24 COB or sniffing tool

PD8	What are the principle sources of Market Risk for this product?
The principle sources of market risk are as follows: 1. Interest Rate Risk. 2. Liquidity Risk.	
PD9	What processing systems will be used to book and account for the transactions?
Loans will be booked in the loan management with corresponding entries in T-24. Pezesha 2.0 is the originating system and is used to manage loan requests.	

5 Assumption, Dependencies, & Risks

5.1 Assumptions

a) For new to bank customers, all KYC documents will be validated before an account is opened
b) All customers have an NCBA Business Account

5.2 Dependencies

a) All customers must have an NCBA Business account before they can use the App
b) Anchors/ Distributors to provide customer (retailer) transactional data in the required format

5.3 Risks

a) Misalignment of project expectations may lead to delays in project delivery.
